

1. Leaking Pipe

2. Activate **POW-R WRAP**

3. Apply Plug Over Break in Pipe

4. **POW-R WRAP** Damaged Area

5. Tighten Layers of **POW-R WRAP**

6. Repaired With **POW-R WRAP**

Frequently Asked Questions

What is POW-R WRAP?

POW-R WRAP is a specially formulated fiberglass tape designed to repair water lines, sewer lines, fluid lines, pipe lines, and anything else that supports fluids.

What pressures will POW-R WRAP support?

POW-R WRAP has been tested to support up to 300 PSI in pressurized lines and was able to prevent infiltration by maintaining a pure vacuum.

What types of tools are needed in applying POW-R WRAP?

No tools are required when applying POW-R WRAP to pipes as long as there is no corrosion, or coatings of any kind on the pipes when applied.

At what temperatures will POW-R WRAP work?

POW-R WRAP has been tested in many temperatures ranging from 800 degrees F to -60 degrees F. Because of the need for moisture (water) to start the chemical reaction the degrees of temperature only has bearing on the time frame for the complete curing process to occur.

Can POW-R WRAP be used on natural gas pipes?

POW-R WRAP can be used to prevent gas leaks from corrosion of pipes caused from the elements. Although anyone working with gas pipes should be certified in that area before attempting any repairs.

On what types of pipes can POW-R WRAP be used?

POW-R WRAP can be applied to all types of pipes including PVC, cast iron, galvanized, and clay to name a few. The uniqueness of POW-R WRAP lies in its E.P.A. approval for use on drinking water lines as well as being suitable for sewer, irrigation and chemical lines.

What are the chances of the section of pipe breaking again after applying POW-R WRAP?

Not only does POW-R WRAP seal leaks in pipes, it also strengthens the vulnerable area of the damaged pipe causing it to be even stronger, in most instances, than it was before.

Is POW-R WRAP a permanent repair?

POW-R WRAP can be considered a permanent repair in most industry and home uses. It can also be used as an emergency fix until a maintenance crew has the time to fit the damaged area into their maintenance schedule. Either way POW-R WRAP enables the home owner or maintenance supervisor to make that decision.

Does POW-R WRAP come in different sizes?

Yes. POW-R WRAP has many sizes to choose from. It is all dependent on the size of piping you are going to apply it to. The following chart indicates the recommended POW-R WRAP sizes to ensure effective repair of the damaged are.

RECOMMENDED POW-R WRAP SIZES

Pipe Diameter	POW-R WRAP	P/N Number
1/4" - 6.0mm	1" x 30"	PW130
1/2" - 13.0mm	1" x 30"	PW130
3/4" - 20.0mm	2" x 30"	PW230
1" - 25.0mm	2" x 30"	PW230
1 1/2" - 38.0mm	2" x 60"	PW260
2" - 50.0mm	3" x 108"	PW3108
2 1/2" - 64.0mm	8" x 72"	PW872
3" - 75.0mm	3" x 108"	PW3108
6" - 150.0mm	4" x 108"	PW4108
8" - 200.0mm	4" x 360"	PW4360
10" - 250.0mm	4" x 540"	PW4540
